

Oral Presentation at AJ&K Medical College Research Symposium

Rashid Latif Medical College (RLMC) is proud to highlight the outstanding achievement of **Fahad Baig**, who secured **1st Prize in the Oral Presentation category** at the **Research Symposium of Azad Jammu and Kashmir Medical College (AJKMC)**.

Fahad presented a systematic review titled **“Use of Artificial Intelligence in Pre-Operative Planning of Hip and Knee Arthroplasty,”** exploring the emerging applications of artificial intelligence in pre-operative assessment, surgical planning, and decision-making for patients undergoing hip and knee arthroplasty.

The presentation addressed an increasingly important area of modern orthopedic practice, highlighting how AI-based technologies have the potential to support more precise planning, improve clinical decision-making, and contribute to better surgical outcomes.

Securing the **first position** in a competitive oral presentation category reflects Fahad’s strong research skills, scientific understanding, presentation abilities, and commitment to evidence-based medicine. His participation also provided valuable exposure to a diverse academic community and an opportunity to engage with researchers and medical professionals working in contemporary areas of healthcare and innovation.

The **Research Cell, RLMC** congratulates **Fahad Baig** on this remarkable accomplishment and appreciates his continued commitment to research and academic excellence. This achievement further demonstrates the

growing participation of RLMC students in **research conferences, systematic reviews, emerging medical technologies, and evidence-based clinical practice.**

Such accomplishments reinforce RLMC's commitment to nurturing a strong **student research culture** and encouraging students to actively participate in national academic and research platforms.
