**Dr. HANNA ABDUL MAJEED**

**BDS, FCPS**

Professor Operative Dentistry

Course Director of Operative Dentistry and ENDODONTIC

Rashid Latif Dental College

**"Empowering Your Quest for Dental Excellence"**

Dear Students,

Welcome to this pivotal chapter in your BDS academic journey! I'm delighted to be your Course Director and guide you through the fundamentals of Pre-Clinical Operative Dentistry. This foundational phase is crucial for your future success, and I encourage you to embrace its challenges, ask questions, and let your curiosity fuel your learning. The preclinical skills you develop here will lay the groundwork for your transformation into exceptional dental professionals. Stay engaged, take an active role in your learning, and enjoy the process. I'm committed to supporting you every step of the way, so don't hesitate to reach out whenever you need guidance or assistance."

Best regards.

### **Introduction**

### **Operative and Pediatric Dentistry**

**Operative dentistry is the art and science of diagnosing, treating, and preventing tooth disease. It involves restoring teeth to their normal function, form, and appearance.**

#### **Description:**

This program of instruction is meant to provide a detailed outlook of tooth anatomy while using phantom teeth and employing the previously learnt techniques on patients, upon supervision. Special emphasis is placed on GV black classification, Class I, Class II, III, IV and V cavity preparation on patients followed by rubber dam placement and amalgam fillings.

**Pediatric Dentistry is a branch of dentistry focused on oral health of children from infancy to adolescence; it emphasizes prevention, early diagnosis and treatment of dental issues while promoting good oral hygiene habits.**

#### **Description:**

Pediatric Dentistry is a theoretical and practical subject which involves clinically performing amalgam and composite restorations on deciduous teeth. Demonstrations of pulpectomies and pulpotomies are given followed by performing these procedures on patients, under supervision. Preventive resin restorations are performed and students are given demonstrations regarding stainless steel crown placement. Space maintenance protocol and extraction protocols are reinforced.

## **CERTIFICATE 4<sup>th</sup> YEAR BDS**

It is certified that Mr. / Miss:

---

Son/ Daughter of:

---

Has completed following tasks related to Operative Dentistry in 4<sup>th</sup> year BDS from \_\_\_\_\_ to

---

1. Instrument identification
2. Rubber Dam Application
3. Pits and Fissure Sealant
4. Class I Amalgam Restoration
5. Class II Amalgam Restoration
6. Class III Tooth Colored Restoration

### **Instructions for Students**

- Complete clinical assessment for 4<sup>th</sup> year BDS session will be done on this document.
- During the whole session of 4<sup>th</sup> year BDS, each student has to perform all the tasks demonstrated by the teachers during demonstrations.
- Students must have all the required instruments during the whole session.
- Students will be allotted supervisors for their clinical training.
- There will be regular practical tests during the whole session. These marks will be given appropriate weightage in the internal assessment.
- Logbook should be signed by their respective supervisors (faculty members) on daily basis.
- Attendance is mandatory (85%, as per UHS regulations). Student will be held responsible for the consequences, if failed to meet the above criteria.

### **Armamentarium**

#### **1. Hand Piece**

- High speed hand piece

#### **2. Rubber Dam Kit**

#### **3. Examination Set**

- Mouth Mirror
- Dental Explorer
- Tweezer
- Periodontal probe

#### **4. Filling Set**

- Caries Excavator
- Gingival marginal trimmer
- Enamel hatchet
- Dycal applicator
- Glass slab
- Cement mixing spatula
- Plastic Instrument
- Mortar and pestle
- Amalgam gun
- Condenser (small and Medium)
- Burnisher (ball shaped, egg shaped and anatomical)
- Carver (Diamond shaped, Discoid-Cleoid and Hollen-Back carver)

#### **5. Retainers**

- Tofflemire with matrix band

### **6. Burs**

- No. 245, No. 330, No. 169L (Tungsten Carbide)
- Round Diamond bur
- Straight Fissure bur (small and medium)
- Tapered fissure bur
- Composite Finishing burs and polishing kit (Bullet, Dumbbell, Tapered)
- Inverted cone bur
- Crown Preparation Burs

### **7. Bur Holder**

### **8. Endo Box**

- K-Files (15-40, 45-80)
- Endo Z Bur
- Endo Ring

### **UHS Examination Policy**

#### **ASSESSMENT (Effective 2026-27 onwards)**

##### **PROCEDURE:**

The candidate will take history, perform clinical examination, diagnose the lesion/ defect, devise a treatment procedure, along with the appropriate treatment.

The principles of caries removal, will be based on the current concepts of conservation of tooth structure, and arrested caries will be preserved.

##### **HISTORY:**

The candidate will clearly write the history composed of the following:

Chief Complaint

History of Chief Complaint

Brief Medical History

Past Dental Experience

Caries Risk of the patient

##### **Assessment Evaluation:**

| S No. | Assessment Details          | Total Marks | Marks with Internal Examiner | Marks with External Examiner |
|-------|-----------------------------|-------------|------------------------------|------------------------------|
| 1     | OSCE (5 stations)           | 10          | 5                            | 5                            |
| 2     | OSPE/ Practical Examination | 50          | 25                           | 25                           |
| 3     | Oral Examination            | 30          | 15                           | 15                           |
| 4     | Internal Assessment         | 10          |                              |                              |
| 4     | Total                       | 100         |                              |                              |

Fax: +92 49 2451099 Website: [www.rlmc.edu.pk](http://www.rlmc.edu.pk)

### **1/I. Objective structured clinical examination (OSCE); 10 marks**

The candidates will visit a series of stations which test their clinical skills. These stations include:

- 1. Judgment and decision making = 2 stations.** The candidate will be provided with appropriate radiographs with a brief history. The candidate may be required to:
  - a. Diagnose
  - b. Devise a treatment Plan
  - c. Suggest Differential Diagnosis

#### **2. Instrument Identification = 1 stations:**

The candidate will be provided with three stations to identify different instruments and their used in Operative Dentistry. Such stations also include identification of hand instruments, based on GV Black Formulae.

#### **3. Clinical Examination and Procedures = 2 stations**

The candidate needs to perform different diagnostic tests used in Operative Dentistry. Such tests may include:

- Use of Electric Pulp test
- Use of Thermal tests
- Taking Bitewing Radiographs
- Taking Periapical Radiographs
- Placement of Rubber Dam
- Application of Fluoride Gel
- Application of Resin Fissure Sealants

### **1/II. Oral Examination = 30 marks**

The candidate will be asked on the following sub-specialties:

1. Restorative/ Operative Dentistry
2. Endodontics
3. Crown and Bridge

### **Final Year BDS- Rotation Credits Policy**

|                                                      |     |
|------------------------------------------------------|-----|
| Class I and Class I Compound (Amalgam Restoration)   | 2   |
| Class I and Class I Compound (Composite Restoration) | 1   |
| Class II (Amalgam and Composite Restorations)        | 2   |
| Class III, IV and V Restorations                     | 1.5 |
| GIC Filling (I, II, III, IV, V, VI)                  | 1   |
| Rubber Dam Placement                                 | 1   |
| Pulpotomy                                            | 2   |
| Pulpectomy                                           | 3   |
| RCT (Anterior tooth)                                 | 2   |
| RCT (Posterior tooth)                                | 3   |
| Crown Preparation                                    | 3   |
| Inlay/onlay                                          | 3   |

#### **Note:**

- All Final Year Students are expected to have a total credit score of 150 by the end of their rotation for quota completion.
- Any missing credit scores should be compensated via phantom teeth restorations, at the end of the rotation.
- All Supervising Demonstrators are expected to give credits, as per the above mentioned chart.

### **Class III Cavity Preparation**

- Cavity Designs:

**A. Conventional-** when caries is entirely on root surface

**B. Beveled Conventional-** When the cavity is large & have enamel margins. Bevel is given at an angle of  $45^\circ$  to the cavosurface

**C. Modified-** When the carious lesion is small & easily accessible
